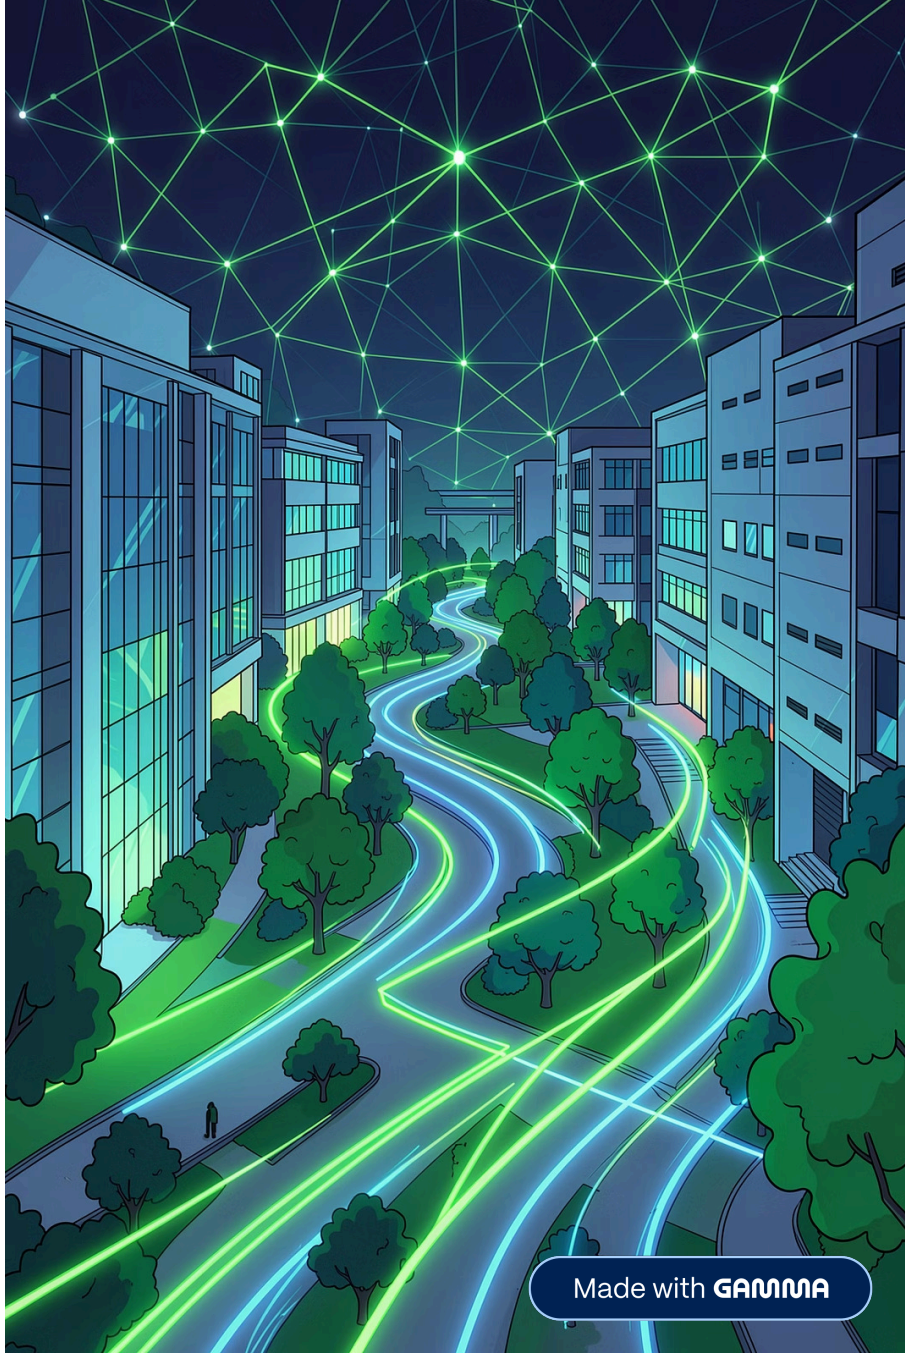
TumTum - Optimize your student life

From Learning to Recreation

An autonomous AI agent empowering students with academic reinforcement and social excellence — acting proactively, without waiting to be asked.

REPLY × TUM CHALLENGE 2026



Made with GAMMA

The Problem: Two Silent Killers of Student Potential

🧠 Post-Lecture Memory Fade

Research shows students forget up to **70% of lecture content within 24 hours**. Without structured recall, passive attendance becomes wasted time.

📅 Semester Tunnel Vision

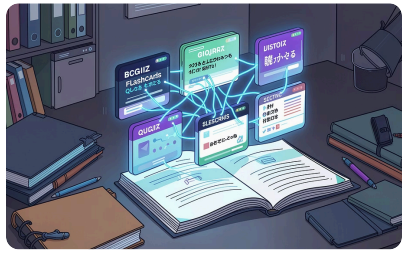
Missing deadlines, networking events, meetups and more

The Solution: An Agent That Acts

The Student Lifecycle Agent doesn't wait for instructions. It monitors, decides, and executes — autonomously — across two mission-critical dimensions.

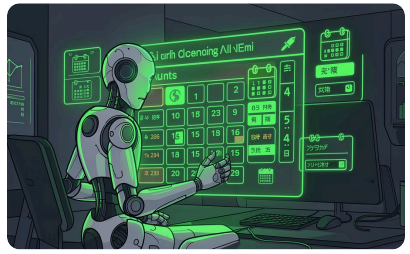
🎓 Student Profile Intelligence

The agent learns your personality, goals, and curriculum!



📚 Active Recall Buddy

Auto-generates quizzes from your lecture slides and quizzes you right after class



🎯 Extracurricular Scout

Continuously scrapes the web to find custom tailored event recommendations

Made with GAMMA

Impact

70%

Memory Retention Gain

Spaced-repetition quizzes proven to reduce forgetting curve by up to 70%.

3x

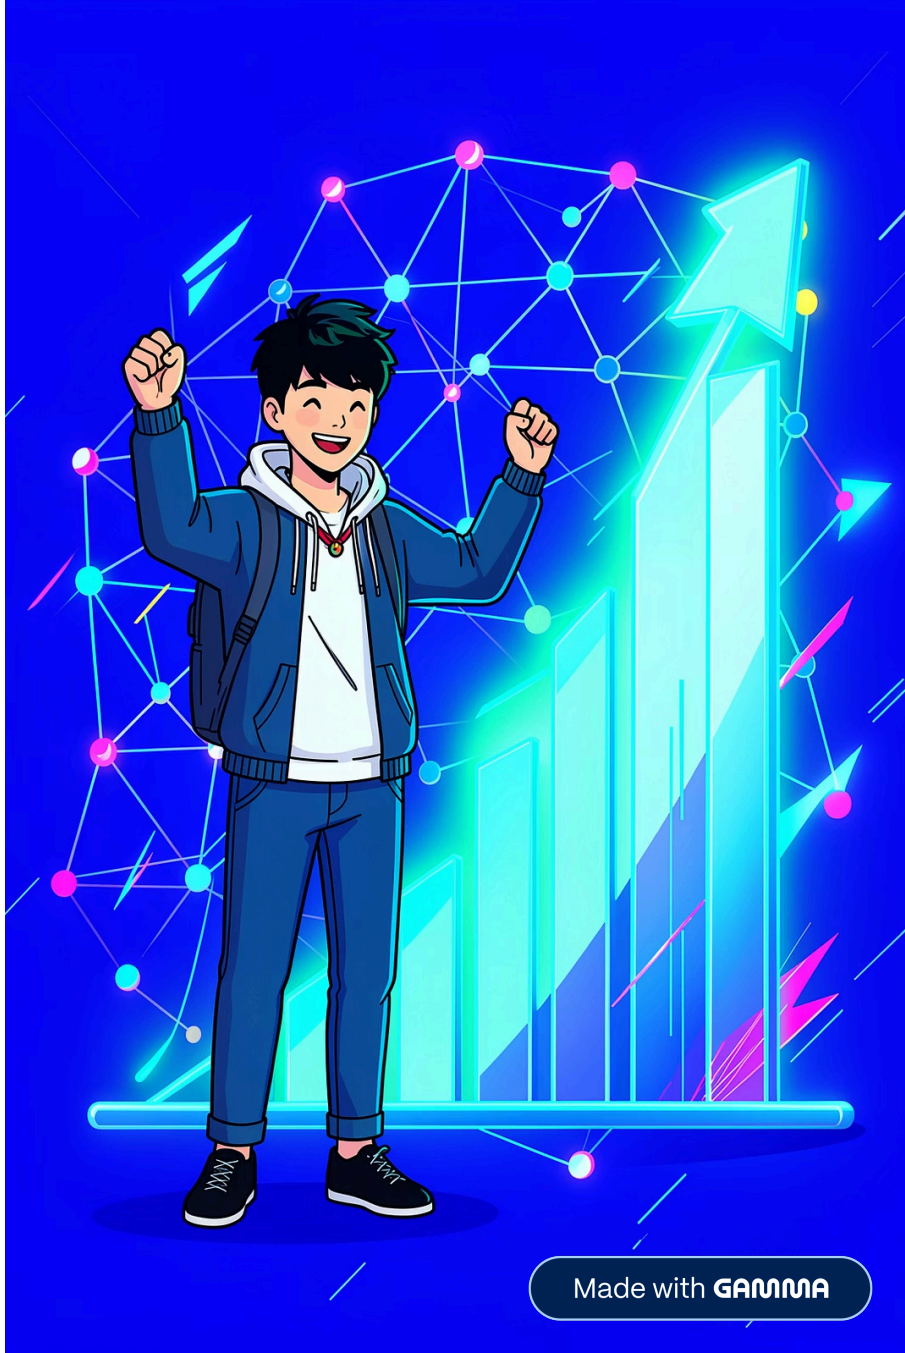
More Events Attended

Students engage with 3x more ZHS, Fachschaft, and career events per semester.

0

Manual Effort Required

Fully autonomous — zero prompts needed for scouting, scheduling, or quiz delivery.



Made with GAMMA

The Future Is Autonomous

Phase 1 — Now

Active Recall Buddy + Extracurricular Scout

Phase 2 — More Features

Course Recommendations: AI-powered course discovery based on your goals, interests, and academic performance.

Phase 3 — Health Integration

Seamless Apple Health & Fitbit integration to auto-track focus, attention span, and physical factors impacting lecture comprehension and retention.

Phase 4 — Continuous Improvement

Cross-User Learning: Aggregate anonymized data across the TUM community to identify optimal study patterns and personalized performance optimization strategies.
